PROFESSIONAL SUMMARY

Adaptive and architecture-focused Full-Stack & Systems Engineer with strong expertise in full-cycle mobile/web application development and embedded edge networking. Proven track record of building production-ready MERN and React Native platforms, architecting low-latency local AI systems, and configuring network isolation protocols (WireGuard, RTOS). Combines a solid backend software engineering foundation with real-world freelance project execution to ship secure, scalable software solutions.

TECHNICAL SKILLS

- **Languages & Core Tech:** JavaScript (ES6+), TypeScript, HTML5, CSS3, Python, C/C++
- **Frontend & Mobile:** React.js, React Native, Expo, Responsive UI/UX Design, State Management
- **Backend & Databases:** Node.js, Express.js, Supabase, MongoDB, RESTful APIs, Database Design & Optimization
- **Systems, Networks & Edge:** Linux Orchestration, Network Namespace Isolation, WireGuard VPN Overlays, Zephyr RTOS, Local IP Routing & Direct System Casting
- **AI & Embedded Tools:** Small Language Model (SLM) Deployment, Speech-to-Text (STT) Pipelines, Git/GitHub, Docker

FEATURED PROJECTS & SYSTEM ARCHITECTURES

Panga Crew — Hyperlocal Event Logistics Platform / Lead Engineer

- Architected and built an end-to-end full-stack MERN (MongoDB, Express, React, Node.js) mobile and web application for real-time event coordination.
- Implemented scalable group messaging frameworks and streamlined user onboarding flow, optimizing client-side bundle size and database queries for low-bandwidth environments.

Rafiki Yangu — Proactive AI Companion Mobile App / Full-Stack Developer

- Designed a mobile-first companion application using React Native, Expo, and Supabase backend services integrated with OpenAI model APIs.
- Structured secure authentication, cloud sync, and optimized client-side state handling to ensure real-time responsiveness.

RoamFi — Edge VPN & Network Isolation Architecture / Systems Developer

- Evaluated and designed a dual-core SoC split-architecture utilizing Zephyr RTOS and Linux orchestration for home network security.
- Implemented WireGuard VPN overlays and network namespace isolation to secure local edge routing.

Local Offline Voice Assistant (Jarvis System) / Developer

- Built a completely offline, local voice-controlled AI system running Small Language Models (SLMs) and STT engines on host hardware without external cloud API dependencies.

WORK EXPERIENCE

Freelance Full-Stack Developer / Nairobi, Kenya

Dec 2023 – Present

- Engineered, tested, and deployed custom web and mobile software applications for diverse client requirements using React, Node.js, and MongoDB.
- Integrated third-party REST APIs, database management systems, and authentication flows into client workflows.
- Conducted system troubleshooting, performance tuning, and bug resolution to maintain system uptime and high execution quality.

EDUCATION & CERTIFICATIONS

- **Software Engineering Certificate (Backend Specialization)** — ALX Africa / Holberton Inc. *(June 2024)*
- **B.S. Engineering in Energy and Environmental Technology** — JKUAT, Nairobi *(Ongoing)*
- **Full-Stack Web Development Bootcamp** — Lakehub Academy, Kisumu *(2019)*

CERTIFICATE OF COMPLETION

This is awarded to

Stosh Ochieng Odhiambo

For completing a 12 Month ALX Software Engineering
Programme with a specialization in Back-end.

FRED SWANIKER
Founder & CEO, AL Group

JULIEN BARBIER
Chief Product Officer, ALX

Date of Issue: 24th June 2024

Program completion date: 18th June 2024

POWERED BY Holberton Inc
